samTrans

San Mateo County Senior Mobility Action Plan
Fact Sheet

Purpose:

- To develop mobility solutions for seniors transitioning from driving to transit and other alternative transportation modes.

The Problem:

- Rising numbers of traffic injuries and deaths due to rapidly increasing numbers of older drivers.
- Public transportation services, including paratransit, that cannot meet all the needs of seniors who must limit or cease driving.
- Strain on families of older people as they deal with the practical and emotional issues of limited mobility.
- Isolation of older people who cannot reach services and activities.
- Strain on public, non-profit, and volunteer services as they attempt to assist older people and their families dealing with these issues.

Approaches:

- Help people drive safely as long as possible and know when it is time to stop driving.
- Help the families of older people know how to assist their aging members in reducing and eventually stopping driving.
- Make streets and shopping areas as pedestrian-friendly as possible so older people can stay active and meet at least some of their needs independently without driving.
- Help older people feel comfortable using public transportation.
- Ensure that available public transportation serves the needs of older people as much as possible.
- Promote community-based alternatives to conventional public transportation.

Objectives

- Raise awareness of the issue in the County.
- Increase understanding of the range of effective methods that are available to help maintain senior mobility.
- Identify realistic programs and projects that can be undertaken by all types of organizations and jurisdictions.

Methods

- Work with cities, agencies, and community-based organizations to identify financially realistic actions of interest.
- Conduct broad-based public outreach through existing organizations.
- Build on extensive research and planning already done by SamTrans, the Metropolitan Transportation Commission, the County of San Mateo.

Timeframe: March 2005 through April 2006
Funding: State Planning and Research Grant obtained by SamTrans through the Metropolitan Transportation Commission and Caltrans.
