Grant Prospecting and Collaboration

San Jose Conservation Corps' Development Team assists with identifying funding sources for high need projects and writing the grant proposals to fund the projects.

- State Grants Programs
- Federal Grants Programs

We facilitate the project development process to build a competitive grant proposal with a clear, compelling narrative.

California Coastal Conservancy Grant

An open rolling grant program for any kind of outdoor work related to Ocean and Bay access.

- Can cover everything from Restoration projects, invasive species removal, trail and enhance recreational amenities.
- Through collaborating with the San Jose Conservation Corps on a grant such as this, we create a strong grant proposal to complete the work while also offering unique workforce development opportunities for local youth.
- This then creates the workforce to steward these projects and complete others in the future.

Wildlife Conservation Boards Grant Program

A Multi-Funding Stream Grant Program that distributes funds from Prop 68,1, 84,40,50, the Habitat Conservation Fund, the Greenhouse Gas Reduction Fund and many other state funding sources.

- Perfect Grant program for any kind of Restoration or urban greening based project.
- Bioswales, Park improvements, fuel reduction projects, public access projects, flood mitigation, and other potential projects.
